

Modular Storage System ProDevice MSS

The ProDevice MSS (Modular Storage System) drawers are a smart, professional and space-optimizing solution for secure storage and archiving of data media (magnetic tapes, HDD 3.5" and 2.5", SSD disks etc.) in a 19" rack.

Access control, measurement of environmental conditions in the drawer, as well as standard fire protection systems in server rooms guarantee that media stored in the MSS drawer are much safer than when stored in a safe.

If there is no free space in your data center / server room, or if you simply don't want to install an additional external separate cabinet, the MSS is the solution for you.

Benefits

Scalability

If you have a small amount of data media, you don't have to buy a cabinet or an expensive safe - MSS will be the optimal solution. 1 module can store up to 108 LTO tapes which means that a 47U standard rack can offer space for up to 1620 LTO tapes.

Safety

Solid construction, security lock and environmental sensors (humidity, temperature) guarantee you full control and protection of stored data.

Optimization

Use the server cabinet not only to install IT equipment, but also to store data carriers. Available as a single module or the entire system (can be delivered with rack stand or cabinet).

- ✓ Antistatic coating
AXALTA AS03404079227 CAST IRON AS
- ✓ 1,5 mm steel
- ✓ EN 10130 (SAE1008 / SAE1010 USA)
- ✓ Access control

- ✓ Touchscreen
- ✓ Humidity and temperature monitoring
- ✓ Capacity monitoring
- ✓ Rack rails
